URGENT

Dear Sirs

Re: European Patent Application No. 00307873.0(1086731)
Sega Corporation
Data Processing Method
Your Reference: 1999215E02EP

The partial European search report for this application has now been issued. We enclose a copy of the search report, together with copies (to follow) of the cited documents and the "Annex" showing equivalent documents.

You will see that three documents have been cited, copies of which are enclosed with the hard copy of this letter. The citations have been made in category X, and the Search Examiner considers them to anticipate claims 1-4, 7-10 of the application. We have not examined the citations except to check that they are generally relevant.

The Search Examiner who performed the search has raised a "lack of unity" objection against the present claims. That is, he considers that the claims refer to five inventions which are not linked by a common inventive concept. These "inventions" are set out on a "Sheet B" accompanying the search report.

So far, only the first invention (claim group 1-4, 7-10) has been searched, and if no action is taken, the application will proceed on the basis that this is the invention for which protection is sought. If the Search Examiner's assessment of lack of unity is correct, it will not be possible to obtain separate protection for other claim groups except by filing one or more divisional applications.

However, if further search fees are paid, further searches will be carried out specifically with regard to the subject-matter of the other inventions. If this is done now, it will be possible for the present application to proceed on the basis of any one of the searched inventions.

Fax: +44 (0)113 233 9401

Email: hl@haseltinelake.com

www.haseltinelake.com

In view of the large number (five) of "inventions" identified in this case, it may not be economic to pay four additional search fees for all of them. Therefore, please consider whether any of the unsearched claim groups are especially important. Please inform me how many further search fees you wish to pay, and which claims are to be covered.

N.B. The European Patent Office has set a one-month term expiring 10th August 2003 for paying further search fees, in order to initiate further searches at this stage. If you do require additional searches for any of the unsearched claim groups, please inform me as soon as possible.

There is also the possibility of filing voluntary amendments in the light of the documents found in the search, although there is no obligation to file any response to the search report at this stage. We can simply await the issue of a first substantive official action, in which the Examiner should consider in detail the relevance of the cited documents to the novelty and inventive step of the present invention. However, if you believe that it would be appropriate to amend the application before a first substantive official action is issued, please inform us of any amendments which you require.

Yours faithfully

L E Billington

COMMUNICATION

The European Patent Office herewith transmits the partial European search report under Rule 46(1) EPC relating to the above-mentioned European patent application.

Copies of the documents cited in the search report are enclosed.

The applicant's attention is drawn to the following:

The search Division informs the applicant that if the European search report is also to cover inventions other than the invention first mentioned in the claims, a further search fee must be paid for each of these inventions, within ONE MONTH after notification of this communication.

If the application has been filed up to 30 June 1999, the search fee in force before 01 July 1999 (EUR 869,-) or the equivalent applicable on the date of payment is payable. This applies also to the search fees requested under Rule 46(1) EPC. See also OJ EPO 06/1999, 405.

- ☐ The abstract was modified by the Search Division and the definitive text is attached to the present communication.
- ☐ Additional set(s) of copies of the documents cited in the European search report is (are) enclosed as well.

LACK OF UNITY OF INVENTION
SHEET B

Application Number
EP 00 30 7873

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. Claims: 1-4,7-10

synchronizing game devices in a network to the longest delay of any of the participating devices; compensating for different network latencies.

2. Claims: 5,6,11,12

displaying an image of objects arranged in a virtual space; rendering of virtual objects.

3. Claims: 13-16

setup of a communication between networked gaming devices.

4. Claims: 17,18

registration of game players.

5. Claims: 19-24

determination of the ranking of players in a network game.
